

**LASER POINTER** → ★

**REMOTE CONTROLLED SWITCH**

**SAVE ENERGY SAVE MONEY**

**REMOTELY CONTROL INDIVIDUAL ITEMS  
SUCH AS 240VOLT AC DOWN LIGHTS**

Lights are often wired in common  
and can not be switched on and off individually.

**USE AN ORDINARY RED LASER POINTER**

Easy to use. Sweep a LASER POINTER's dot across the centre of the unit. A White/Red LED indicates that the unit is energised. When the unit is switched to the off position, the white LED is on and can serve as a dimly lit night light. When the unit is switched to the on position, a red LED is on.

**BUILT-IN MEMORY** The unit remembers the last state it was in before power was switched off to the unit.

**EASY TO INSTALL** Operates with 240Volt AC.  
Use qualified personel to install.

**Weather proof model also available**

LASER Pointer is sold separately.
